

Little Boy Blue

modular synthesizer for live performance

standard edition

Features:

- 2 voltage controlled ramp (sawtooth) oscillators
- 1/4" input with variable gain
- envelope follower with optional inverter
- 2 channel mixer
- intermodulating output stage

Deluxe Edition Extra Features:

- manual and voltage control of oscillator wave shape
- stylish oiled fir case

deluxe edition

Both instruments run on 2 9v batteries. Current drain is low, typically offering 50+ hours of battery life. The circuitry is hand-built with premium parts, using discrete transistors, no chips. Instruments are supplied with a set of banana cables for patching. Input and output are via standard 1/4" connectors. Output is a hot line level, for extra buzz.
